

The all-new Webex: Unprecedented and unmatched

If you haven't upgraded to the all-new Webex yet, your teams are in for a surprise. Unlike anything you've already experienced, the new Webex is a complete workflow and teamwork tool that offers unique one-touch simplicity, end-to-end collaboration, and tons of new features and experiences that make it an all-new, fully integrated solution. And it's just an upgrade away.

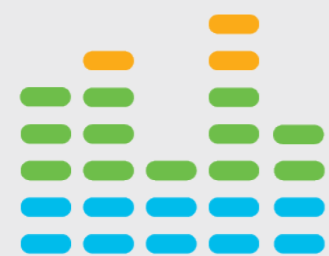

Stunning innovations you won't find anywhere else

The newest version of Webex Meetings, with People Insights, is designed to make connections more meaningful, with real-time background information about everyone in the meeting. And the Webex Room Kit Mini is a marvel, equipped with Webex Assistant, a zero-touch, voice-controlled digital assistant that helps you with mundane meeting tasks like starting, ending, or controlling your meeting.

Modern video-first experience

Make full use of the all-new video-centric redesign with Webex Video Mesh. This highly flexible, one-of-a-kind architecture allows customers to keep traffic on-network and improve video quality, while saving bandwidth.

Increase wideband audio and decrease PSTN costs.

Cisco's Webex Edge Audio lets you automatically join meetings via direct voice over IP (VoIP) to the cloud or your existing public switched telephone network (PSTN), with no change in behavior. Reap major cost savings while utilizing unmatched full audio and video architectural flexibility.

Collaboration that keeps going

Webex Teams lets you create one-to-one or team workspaces and continue discussions before, during, and after the meeting ends, with messaging, stored shared content, digital whiteboards, and integrated calendaring.

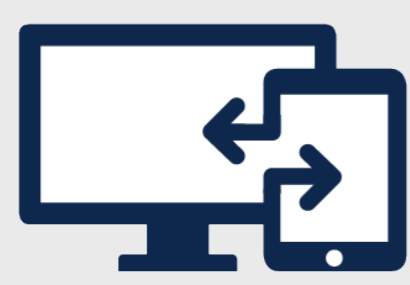

Join or host from anywhere with one button.

Push one button to join or host from any device or platform—desktop, mobile, video, or browser—no downloads or plug-ins needed. Plus, Webex offers the most seamless integration with the tools you use most. No other platform makes it easier to meet, collaborate, and stay productive.

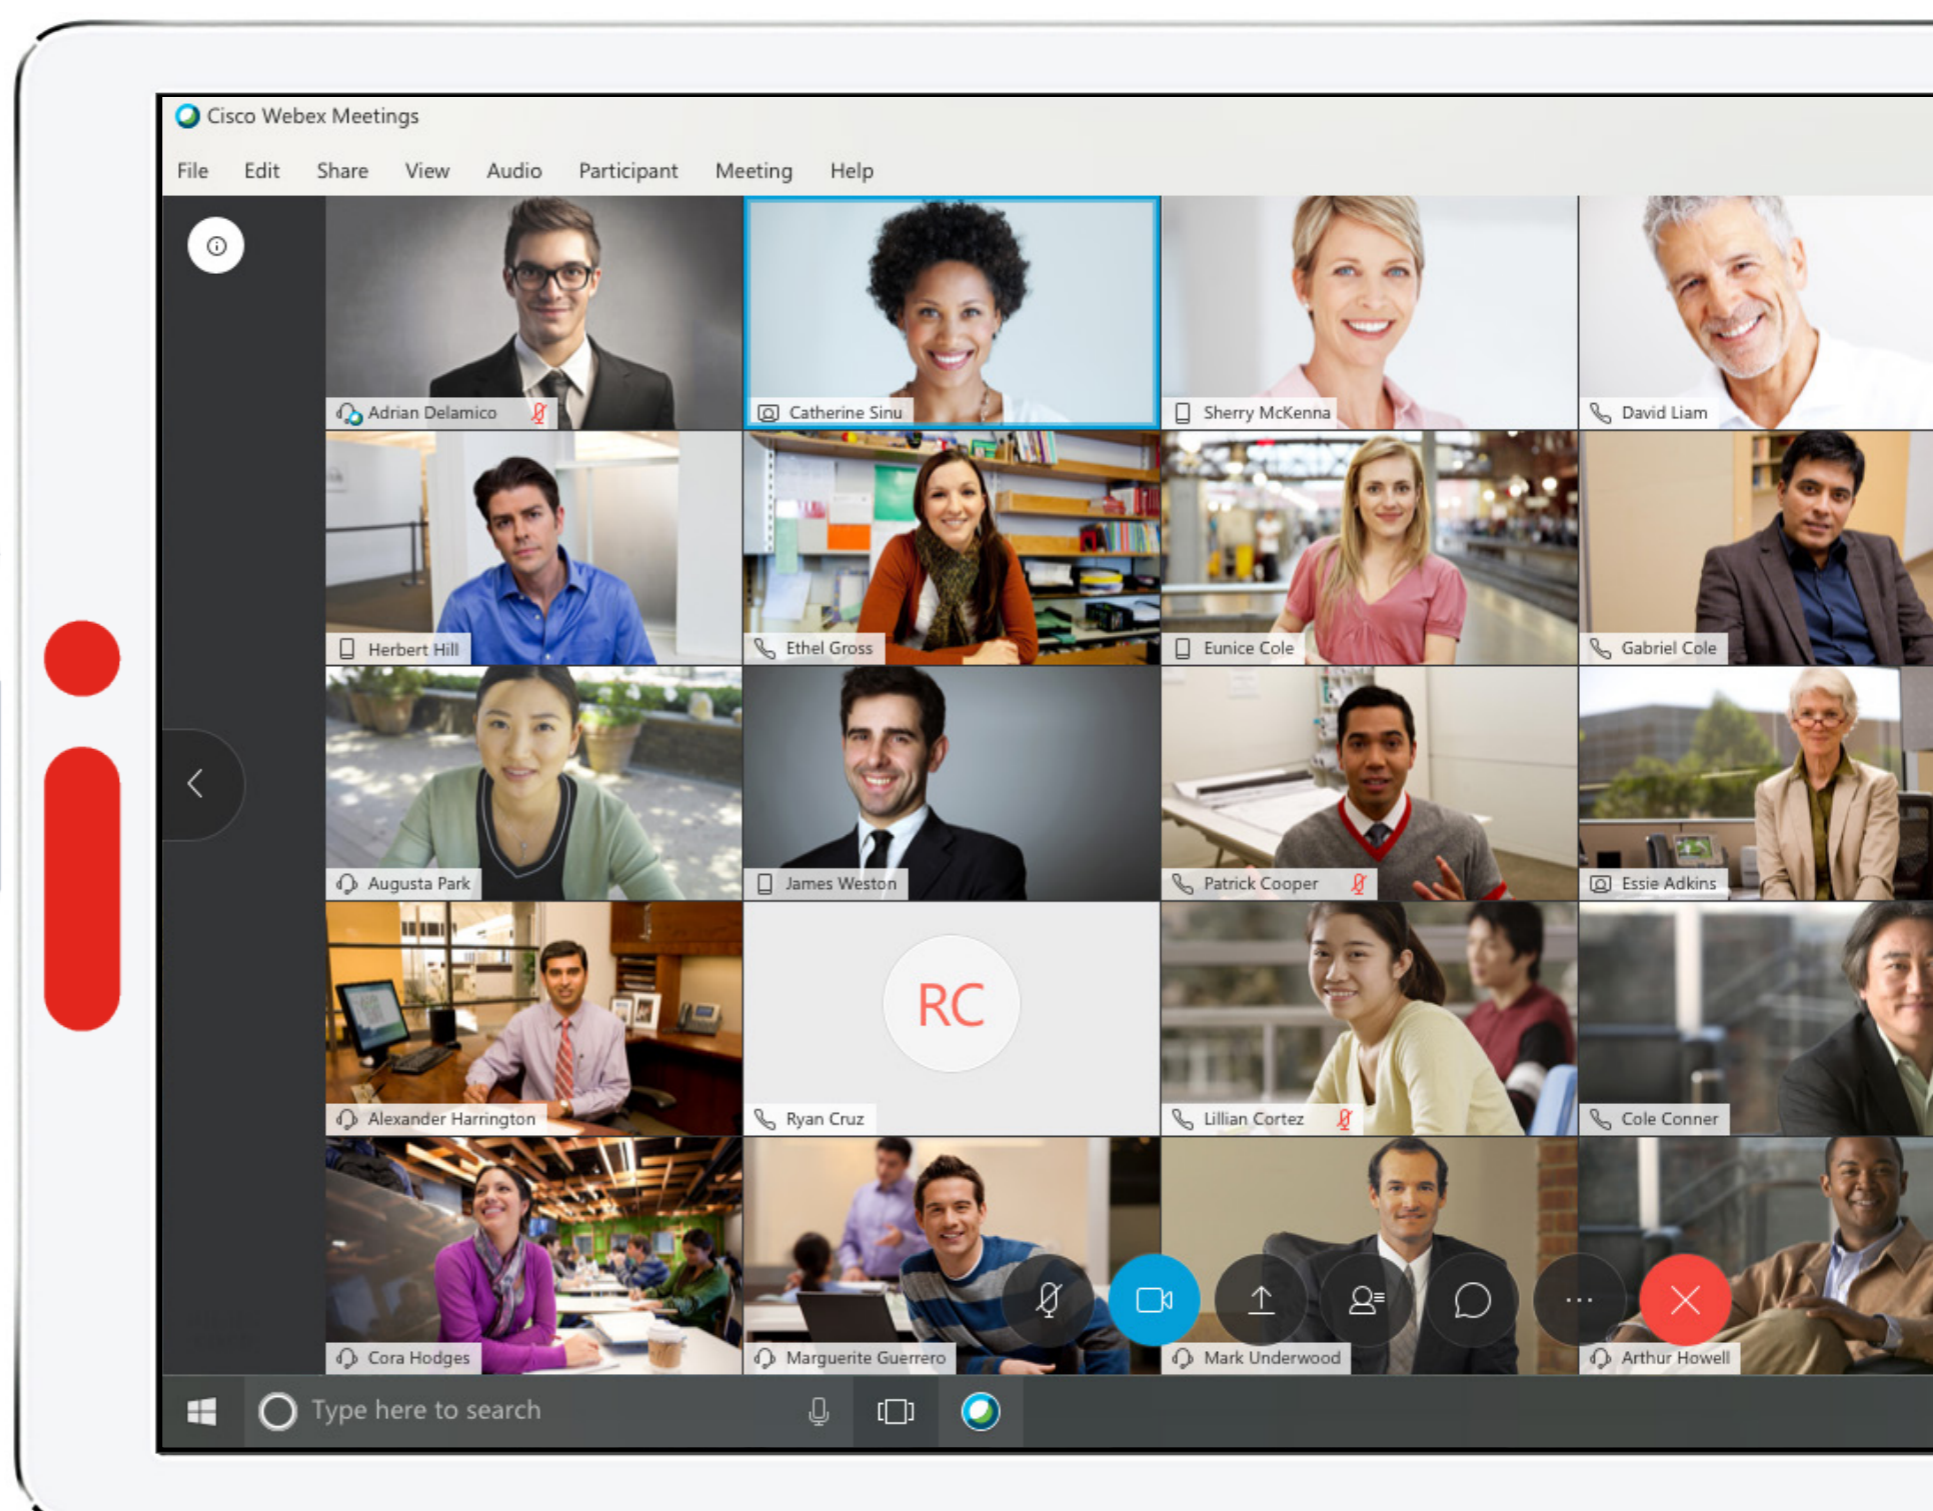

End-to-end quality and security

Send your Webex traffic over an end-to-end managed quality-of-service-enabled direct connection to Webex using Webex Edge Connect. Rest assured that your important Webex meetings are not at the mercy of hackers and denial-of-service attacks.

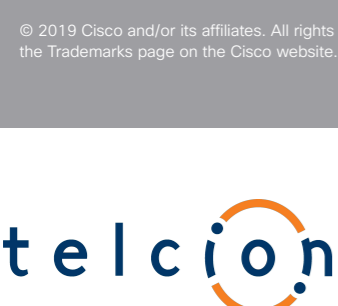

The magic of Webex Meetings and Webex Devices

Magic happens when you combine Webex Meetings apps with our powerful video devices. The Webex Meetings and Webex Teams apps automatically connect to the video device as soon as you enter the room, so you can start the meeting instantly or transfer your call from mobile to the big screen. Connect wirelessly from your mobile or desktop app to share content or control the video device.
